

## Add Aim® EW Herbicide to Your Tank

### Velvetleaf Control

**Aim ¼ oz + glyphosate 1.5 – 2.0 pt/acre**

### Velvetleaf Control (?)

**Glyphosate 1.5 – 2.0 pt/acre alone**

Both of the above photos taken from same field 5 days after application.

### Enhance Weed Control with Aim

|                |                  |
|----------------|------------------|
| Velvetleaf     | Lambsquarters    |
| Pigweeds       | Black Nightshade |
| Tall Waterhemp | Morningglories   |
| Field Bindweed |                  |

Postemergence applications of Aim may result in a temporary crop response. New growth is not affected.

### Use Guidelines

- Do not apply Aim to plants when dew or moisture is evident, or when a rainout may occur.
- Do not apply Aim when Crop Oil or MSO is in the tank-mix.
