

RUBY FIELDMASTER™

SOY-ENHANCED PREMIUM DIESEL

Cenex® Ruby Fieldmaster™ is a true premium diesel. The exclusive additives in Ruby Fieldmaster work together with a high-quality base fuel. They work continuously to keep your equipment in top shape, delivering up to 4.5% more power and longer engine life.

You can count on its complete, quality, balanced, additive package:

- **Cetane:** Promotes quicker, more fuel-efficient starts and reduces smoke and harmful emissions. It reduces strain on engines and electrical systems, reducing downtime and maintenance costs.
- **Aggressive Detergents:** Clean the fuel system and keep it clean for better fuel economy and more horsepower.
- **Lubricity Components:** Reduce friction and wear on the fuel pump and protects vital parts.
- **Demulsifiers:** Isolate water for easy removal. They prevent water from going through the fuel system where it combines with sulfur to form sulfuric acid, which corrodes engine parts.
- **Corrosion Inhibitors:** Prevent rust and corrosion formation on internal parts of the fuel pump, extending pump life.
- **Stabilizers:** Reduce gum and varnish buildup that can clog filters on tanks and equipment. This extends fuel life and requires fewer filter changes.
- **Soy Biodiesel:** Every gallon of Ruby Fieldmaster is enhanced with a small amount of soy-methylester (Biodiesel) for superior engine protection.

Ruby Fieldmaster is backed by the best warranty in the industry. The Total Protection Plan® Warranty offers Ruby Fieldmaster users up to 10 years, or 10,000 hours of engine, transmission, and injection pump coverage in qualified agricultural equipment.

If you're using Ruby Fieldmaster and anything goes wrong with your equipment, parts covered by the warranty – new or old – will be repaired or replaced. No questions asked. That's an offer you won't find with any other diesel fuel.

For more information on Ruby Fieldmaster or the Total Protection Plan Warranty, see a Cenex branded distributor near you.
